## BABY'S FACE ONE SORE WITH ECZEMA

Cried for Hours, Could Not Sleep. Resinol Brought Rest and Cure.

Reading, Pa.—"My baby girl had eczema for over six months. It was painful and itching, she could not sleep day or night, she would scratch till blood and water would run down her neck. Then it burned her so she cried for hours at a time. The right side of her face was one sore and scab.

"I got the samples of Resinol Soap and Resinol Ointment on a Saturday morning, and put them on, and put them on again in the afternoon and in the evening before I put her to bed, and she went to sleep and slept till next morning. I thought I was in heaven the first night, and by Monday the eczema was dried up so that all the scabs fell off. Resinol Soap and Ointment cured my baby." (Signed) Mrs. Wm. M. Fletcher, 54 So. 17th St., Aug. 21, 1912.

If you or any of your little ones are suffering from eczema, rash, tetter, ringworm, or other itching, burning skin eruption, there is only one better proof of the value of Resinol. That is, try it yourself and see! You can get samples free by writing to Dept. 18-M, Resinol, Baltimore, Md. Resinol stops itching instantly. Prescribed by doctors for 18 years, sold by every druggist.

Don't worry over the fact that, by reading the ads. in the Telegram you might have saved a few dollars on last week's purchases—but get interested in the fact that the same thing is true of your next purchase.

True Values **B & B** True Values

PITTSBURGH, PA.

Perhaps you can save no more than a dollar on this week's expenses by reading the ads. in the Telegram—but it's a dollar that might just as well be saved.

## THE DEVIL'S ROOF.

Treacherous Snow That Conceals a Crevasse in the Antarctic.

"Visitors to Switzerland alone can appreciate the dangers of crevasses in the ice sheets. But in the antarctic they are more numerous and attain far greater dimensions than in Switzerland," said L. C. Bernatchez, the explorer, to a London Chronicle reporter. "They lie hidden under the snow, and very often the explorer does not know that he is on a crevasse until he has traveled some yards, and then he hears a hollow sound. He will then wonder whether to go on or turn back, but experience has taught that the greater danger may be incurred by turning back.

"Crevasses are peculiar to the ice sheets over land. They are nonexistent at the north pole because there the ice is a frozen ocean. All antarctic expeditions have had to negotiate the difficulties of crevasses, and sometimes their existence has compelled the explorer to make a detour of many miles.

"Where land juts out into the sea, or to be more precise, into an ice sheet in the antarctic, several crevasses will be found radiating from this point. Some have been known to be fifty yards wide and 2,000 feet deep. Instances are also found where a sledge has sunk halfway through the ice roof and has been rescued with the greatest difficulty. In these cases the explorers were luckily roped to the sledge, but they had the uncomfortable experience of being suspended over a deep chasm."

Captain Amundsen calls the treacherous snow which conceals a crevasse "the devil's roof," while both the late Captain Scott and Sir Ernest Shackleton have described it exhaustively.

## HITTING THE HYPHEN.

One Would Hardly Think the Little Mark Was So Important.

There is enough energy wasted in placing the hyphen in "to-day," "to-night" and "to-morrow" every week day to haul a passenger train around the world. It is claimed there are 200,000,000 English writing people and that they average to hyphenate these words three times a day. Some may not average to do this more than three times a week and a few perhaps not three times a month; others write those words and place the hyphens in them scores of times each day, especially newspaper men, typewriters, authors, business men, school children and the like.

The acquiring of sufficient power from making these hyphens each day to propel a passenger train around the world is figured on the basis that it takes half an ounce of energy to make the stroke either with pen or pencil and more for a typewriter that represents the hyphen, and this would total 2,000,000 pounds of energy, or sufficient for the train.

It takes an ounce of energy to make the hyphen on a typewriting machine and three to make it on a typesetting machine, and the statistician has figured that typewriting and typesetting machines alone take up sufficient energy each day to propel a battleship from New York to the Panama canal.

All these figures were compiled as an argument against using the hyphen in these words. Many people do not, but the majority do. Those who are working toward greater efficiency in everything claim that the hyphen in these words is not at all necessary and should be discontinued by every one, saving a great deal of valuable time and energy.—Philadelphia Ledger.

## TRAVELS OF A COMET.

Last Seen in 1681, It Is Due to Visit Us Again in 2256.

There is a comet that comes within sight of the earth every 575 years. Its tail is millions of miles in thickness and many more millions of miles in length. It was first seen, so far as history records, 1,700 years before the birth of Christ. In a few weeks it faded from the sky, only to return in 1104 and 619 B. C. The year that Julius Caesar died—44 B. C.—it came again, returning in 631 and 1108 A. D. The last time it was seen was in 1681, when Sir Isaac Newton beheld it and discovered that comets are kept in their orbits by the sun, the same as the earth and the other planets.

Over two and a quarter centuries have now passed since the comet disappeared. Even if it has been traveling no more rapidly than the earth goes around the sun its enormous bulk has been shooting through space at the rate of about 1,500,000 miles a day. Yet in the year 2256 this same old comet that was already a well known visitor when it looked down upon the deathbed of Julius Caesar will again come within sight of those human beings, yet unborn, who will then inhabit the earth.

Talk about a railroad train going halfway across a continent in three days and reaching its destination on time! What is such a performance as compared with that of a comet that makes a trip of 810,000,000,000 miles in 575 years and keeps so closely to its schedule that it always bursts from the darkness at the moment when the astronomers expect it!—New York Press.

## Mending Eggs.

The following is taken from Farm and Fireside:

"During the late season last spring I had placed a sitting of fine eggs. A few days before the chicks were due two eggs were accidentally cracked and began to bleed, showing that the chicks were fully developed and alive. I took the eggs from the nest very carefully, melted a little paraffin, and when it was slightly cool I poured it over the broken places of the eggshells, being careful not to cover any more surface than was necessary. Both the eggs produced fine, healthy chicks that were raised to maturity."

## WESTON

Man Dies in Local Hospital After a Lingering Illness.

The body of J. A. Delarr, a well known business man of Weston, who died in a local hospital after an illness of Bright's disease was taken to his home there Sunday evening. Funeral services were held at the home and the burial was in charge of the Odd Fellows lodge. The deceased man is survived by his wife.

## GOOD WELL.

Near Folsom, this county, the Vesper Oil Company has completed its second test on the W. L. Perry farm and has a light pumper. In the Wallace district, Groves and Parrish has completed a test on the H. M. Garrett farm and it produced forty-eight barrels the first twenty-four hours after it was drilled into the Gordon sand pay.

## WORKING ON ROAD.

Three men are working on the crematory road as a result of sentences imposed upon them at Sunday morning's session of the police court by Mayor Will H. Cole. The sentences were made three days each in default of the payment of fines for drunkenness. Three other fellows paid fines of \$3 and costs each for like offenses and were released.

## CHILD DECAPITATED.

FAIRMONT, June 30.—Leorena Potts, two years old, daughter of Mrs. Irene Potts, was beheaded Saturday night at Chiefton, several miles from here, by being run over by a train. Her mother, who keeps a boarding house at Chiefton, was the first to reach the child and witness the horrible spectacle.

## BURIED IN HOLY CROSS.

The funeral services over the body of Grada Andona, the one year old son of Mr. and Mrs. Joseph Andona, of New Chiefton, was held at the home at New Chiefton, at 4 o'clock Sunday afternoon and the burial was in the Holy Cross cemetery here. The child died Saturday morning at 8 o'clock after an illness of stomach trouble.

## NEW LICENSE YEAR.

The new license year in this state will begin tomorrow. It will be the last year liquor licenses will be issued until the prohibition amendment to the state constitution is repealed by a vote of the people in 1917.

## TWO KILLED.

FAIRMONT, June 30.—An unknown negro who was run down by a freight train at Rowlesburg, died here at the hospital. His legs were severed.

Frank McDevitt, aged 19 years, was crushed to death in the Solon mines at Chiefton. His body was taken to Glover's Gap and buried today.

Which babies like because it cures them. Prevents Cholera Infantum, cures Colic in ten minutes. Keep a bottle at hand. 25 cents at druggists. Trial bottle free if you mention this paper. Made only by DRs. D. FAHRNEY & SON, Hagerstown, Md.

## Good Time Now for Blood Health

Warm Days and Proper Help do Wonders for the Blood.

A few doses of that wonderful blood purifier, S. S. S., will start activities in the cellular tissues of the body and soon show decided changes in the skin. The skin is but a fine network of tiny blood vessels, and the specific action of S. S. S. is declared to be a pronounced stimulation of the activity of these cells. Certain it is that in a surprisingly short time any skin eruption shows a most remarkable change; it begins to dry up; the skin scales off in tiny flecks, and a layer of clear, healthy and firm tissue results. The reason for this is in the peculiar stimulation of S. S. S., which enables the cells in the skin to select from the blood the nutriment it requires for regeneration.

This fact has been demonstrated year in and year out in a wonderful number of cases of severe skin diseases that had seemed to be incurable. You can obtain S. S. S. at any well stocked drug store, if you insist upon it, but be sure you are not talked into something "just as good."

S. S. S. is prepared by the Swift Specific Co., 180 Swift Bldg., Atlanta, Ga. Write for their illustrated book on skin diseases.

One of the city's stores is taking a lot of pains to get a message to you today through the Telegram—because it is an important message; and you ought to read it!

## NOTICE OF DISSOLUTION.

Notice is hereby given that at a meeting of the stockholders of The Capital Land Company, a corporation, held on the 28th day of June, 1913, the following resolution was passed:

Resolved, That The Capital Land Company, a corporation, organized under the laws of the State of West Virginia, does hereby discontinue business as such corporation and surrenders to the said State its charter and corporate franchise, and that the president of said corporation cause notice of the adoption of this resolution to be published in the Clarksburg Daily Telegram, a newspaper of general circulation published in the city of Clarksburg, Harrison County, West Virginia, at the principal office of said corporation, once a week for four consecutive weeks, and that when said notice has been so duly published, that said president certify these resolutions, together with the certificate of the publisher of said newspaper, to the Secretary of State of the State of West Virginia as provided by law. Given under my hand this 28th day of June, 1913.

JOHN A. FLEMING,  
President of The Capital Land Company, a corporation.
